INTRODUCTION

This course is designed to educate authorized personnel on the safe use of forklift equipment in competent manner. It touches on the fundamentals of this equipment, pre-use and walk-around inspection requirements, operating procedures, and forklift maintenance. All of which meet standard compliance on forklift operator training requirements.

COURSE OUTLINE

Theoretical

- Introduction
- Type of forklifts
- How a forklift operates
- Pre-start operator checks
- Hazards associated in forklift operation/maintenance
- Determining blind spot controls
- Rationally evaluate loads to be lifted
- Safe operation techniques/practices
