

TRAINING OUTLINE

WELDING SAFETY TRAINING

INTRODUCTION

This course is designed for Welding and Hot work safety aspects. Welding is widely used in various industries such as construction sites, factories and maintenance. During the welding process, the workers are exposed to the strong light, heat, radiation, toxic fume and the fire or explosion due to the failure of welding equipment. To prevent any injuries caused by these hazards, this course aims to provide technique and safety knowledge to experienced welders.

The GOAL of this training is to provide the knowledge needed to recognize and avoid hazards associated with welding and all related hot works.

COURSE OUTLINE

- Safety Legislation related Welding
- Danger Acts & Potential Hazards of Welding
- Safety Measures for Welding
- Inspection & Maintenance of Welding Equipment
- Fire Prevention & Fighting
- Contingency & First Aid for Emergency
- Reporting of Accident & Work Injury
- Use of Personal Protective Equipment
- Permit to Work procedure- HOT WORK

This 2-3-hour Basic Safety training program can be customized to suit each client's specific workplace needs and equipment. Training can be provided in our Training facility or Client facility as per the requirement.

A Training Certification is provided upon successful completion of the program. Wallet cards are also provided for each attendees.
